## Reflections From the Hospital

By Al Benson April 24, 2020

I have just arrived home this afternoon from 42 days in the hospital and have no idea at this point how long I will be able to remain out as all the medical problems are yet to be resolved. The price of old age I guess..

While in there I watched lots of news, some of it pretty grim. These next few articles will be brief until I get my legs under me again.

The United Nations World Health Organization is both a farce and a fraud. At this point it is little more than the globalist mouthpiece for the Chinese Communist Party.

Communist China unleashed the current pandemic on the rest of the world, and you could say in many ways it benefits them in their assault on the free world. The fact that thousands of ordinary Chinese may have died from it bothers them not a bit. After all, how many millions of his own people did Mao kill over the years? A few thousand more now would not bother the Reds one bit if it helped to cripple the United States.

So, with WHO running interference for the Chinese Reds it seems to me we should just stop ALL funding for this highly questionable group permanently. If the WHO is so gung-ho to present the Communist line on this Chinese virus then let Red China foot the bill for it and not us.

Just one more reason we should get the US out of the UN!
