## Chinese Communist Domination of America

By Al Benson July 19, 2020

I have not always agreed with Attorney General William Barr's assessment of all events. He thought the prosecution of Roger Stone for "lying to Congress" was righteous. I totally disagree there. Roger Stone was screwed by the system from the get-go, so Barr was way off on that one.

However, in his recent comments about what Communist China is trying to do to this country he is right on target.

According to the John Birch Society Barr gave a speech at the Gerald R. Ford Presidential Museum and he talked about how Red China is "engaged in an economic blitzkrieg" which intends taking over several key areas of our economy "such as the technology, pharmaceutical, and entertainment industries as a way of replacing the U.S. as the world's leading superpower."

Barr said: "The CCP (Chinese Communist Party) has launched an orchestrated campaign, across all of its many tentacles in Chinese government and society, to exploit the openness of our institutions in order to destroy them." I don't expect your "ever observant" news media has told you much of this. This is the sort of thing you are not supposed to be aware of and the "news" media, much of which is in the Chinese Communists' hip pocket along with their wallet, is going to make sure you don't figure this out.

According to the John Birch article: "(Barr) added that China 'has systematically preyed on American companies' by imposing health market obstacles like price limitations and counterfeiting. The attorney general noted that Chinese nationals employed at American pharmaceutical companies have been caught stealing secrets in both the U.S. and abroad."

Said Barr: "Sadly, examples of American business bowing to Beijing are legion," and he gave as an example, which I have also heard about from other sources, about the way Hollyweird practices regular censorship of its movies in order to kowtow to the whims of the Chinese Communist Party. So your so-called "entertainment" business really ain't all about entertainment—it's about feeding you with the kind of "entertainment" that is acceptable to the Chinese Communists. If anyone wonders why my wife and I quit going to movies years ago, this is one of the main reasons. Anymore, entertainment has become Marxist propaganda. Barr noted that "This is a massive propaganda coup for the Chinese Communist Party." And they don't even have to say a word about it anymore. Hollyweird by now knows what the Reds want and just churns that out automatically. So enjoy your next movie—if you can separate the propaganda from the entertainment!

And Barr also had a warning for American businesses that work with China. He reminded them: "If you are an American business leader, appeasing the PRC may bring short term rewards. But in the end the PRC's goal is to replace you." Barr noted the "big tech" companies—*Apple, Google, Microsoft and Yahoo* as being all too willing to *collaborate with the Chinese Communist Party...* In other words, you are doing exactly what Lenin said you would do—**selling the Communists the rope they plan to hang you with!**

Kind of makes you wonder whose side the "big tech" companies are really on doesn't it? One thing you need to realize—it ain't ours! If you can find anything on the internet about Barr's speech that hasn't already been okayed by the Chinese Communist Party it might be worth your time to check it out.
