Is Fauci A Mouthpiece For the

Communist-Dominated World Health Organization?

By Al Benson July 15, 2020

Recently, Dr. Anthony Fauci, director of the National Institute for Allergy and Infectious Diseases gave a virtual speech to students at Georgetown University. Part of what he said was to urge the Trump administration to restore its ties with the Communist-dominated World Health Organization and he said this organization is needed to “confront pandemics like the current coronavirus”, or what I refer to, politically incorrectly, as the Chinese Virus. I realize it’s not “cool” to refer to it that way, but then, the truth is not always “cool” so get used to it.

In articles several weeks ago I stated that the *World Health Organization* was nothing more than a mouthpiece for the *Chinese Communist Party*. Now it would seem that Fauci is becoming a mouthpiece for the Communist mouthpiece. Of course it naturally follows that if we restore our ties to the WHO then we will automatically restore our funding to it. I think that is something Fauci would rather enjoy.

In the beginning of all this virus insanity Fauci strove to come across as totally apolitical—supposedly knew nothing about the political ramifications of any of this. But as time goes by and I read more and more about him, I have become convinced that he is, in reality, a “swamp creature” of the political left.

I hope Mr. Trump figures this out before too much longer. Jon Rappoport, writing on <http://www.lewrockwell.com> for July 15th said, in comments to Mr. Trump, “Several times you’ve said ‘It’s no good if the cure is worse than the disease.’ Surely you understand by now, the cure IS the disease. The H-bomb that went off in the middle of the economy was and is the whole point of the invasion, which has been taking place under your nose. With your assistance. As a result of your failed marriage to Tony Fauci. Let’s put aside the gloss, Mr. Trump. You understand the real effect of the lockdowns. The effects the networks refuse to deal with, on the evening news... You allowed Fauci to become head of the coronavirus task force, and to remain in that position, spreading vast clouds of overblown lies about the ‘pandemic’ and the fascist measures needed to stem it.”

And most of the measures put forth for the consumption of the public *have* been fascist! Many of the measures put out there supposedly to combat this Chinese virus have been little short (if any) of rank totalitarianism. Governors and mayors have had an absolute field day informing the public about what they, from henceforth, may or may not be able to do via government edicts, most of which are blatantly unconstitutional.

In his new book *China—The Deep States Trojan Horse in America* Arthur R. Thompson, head of the John Birch Society, has observed, in a footnote on page 101 that “Dr. Fauci, in his responsibility as the federal infections disease leader, gave \$3.7 million of United States taxpayers’ money to the Wuhan laboratory for coronavirus development—after the US declared a moratorium on such funding. At the height of the pandemic in China, while the Chinese were hiding the problem from the world and manipulating WHO, Fauci stated on FOX television that he believed China was being open and transparent.” Read this paragraph again and let it grab your attention. \$3.7 million in US taxpayer funds for “coronavirus development”? Almost sounds as if we were paying for our own destruction!

As this Chinese virus has gone along and almost totally destroyed our economy, I have asked myself—what better way could the Deep State have come up with to seriously damage Trump’s chances for re-election in November? I realize more than that is involved, but I’d be willing to bet that’s a major consideration. The Deep State wants Trump gone more than anything so they can get Biden into office so his handlers can then get back to dismantling everything Trump has accomplished in the past three and one half years.

And as far as China’s plans for this country, we will be dealing with Mr. Thompson’s new book and its implications for this country in the days to come.
