

Revised History

Barack Obama's Third Term

By Al Benson June 2,, 2021

A few years back I picked up a book at a used book sale that was one of the best investments I ever made. It was Stanley Kurtz's book about the life of Barack Obama, called *Radical-in-Chief*. Kurtz showed how that, from his earliest days, Obama had been schooled and trained and taught how to think like a radical socialist. By the time he grew up he was incapable of *any* other kind of thought. He is living proof that if the twig is bent to the left the tree will grow into a socialist monstrosity. Many astute writers have noted that the Harris/Biden Regime is nothing more than Obama's third term as president, the third term being "unofficial" naturally. But even though it is "unofficial" Obama just can't resist bragging about it.

An article on **Breitbart** for June 1st by Charlie Spiering noted that: "President Barack Obama said in an interview published Tuesday his former Vice President Joe Biden was finishing the work he began to redistribute wealth through programs like Obamacare. 'I think that what we're seeing now is Joe and the administration are essentially finishing the job' he said." And he commented on how ninety percent of the folks who were in his administration are still there "building on the policies we talked about." I submit, what more evidence do you need? For those who might be interested, the book *Radical-in-Chief* is still available in limited quantities at Amazon and also at Barnes and Noble. It's worth getting if you can. Originally, Hillary was supposed to take over Obama's third term and cement this country into part of the world socialist milieu but she was so unpopular no one could stomach her and so the Trump administration ended up becoming a major speed bump on the road to the New World Order. The people that inhabited the Deep State realized that Trump was not going to play their game and so they spent his entire four years in office trying to overthrow his administration in one way or another. No other president has been subject to the kind of harassment Trump was This alone should show you that he was not "one of the boys."

Yet, everything the Deep State tried to unseat him failed—until they got to the November, 2020 election. By that time they had designed a plan they felt was foolproof—targeted election fraud in certain key areas that would be just enough to tip the scales in Biden's favor in states he needed to win the election.

They did it, and it seemed to be working.

But, now, with Arizona taking the lead, some states are planning on doing forensic audits of their ballots because, as usual, the Deep State operatives, in their haste to give Biden the victory so Obama's socialist remake of the country could continue, have overdone it. What's more, some of them even bragged about it on video.

My most recent article *The Deep Rig* detailed some of this, which I will go into in some future articles.
