Does The UN Intend to Control Health Care In America?

By Al Benson May 25th, 2022

There was an article by Selwyn Duke on <http://www.thenewamerican.com> for May 21st about the United Nations organism the World Health Organization and its bid to override the sovereignty of individual nations regarding their health care.

Mr. Duke observed: “Commit malpractice—gain control. While this doesn’t appear to be a recipe for success, it absolutely is working for the World Health Organization. This entity did, after all, claim the coronavirus couldn’t be transmitted person-to-person and then sabotage the investigation into whether the pathogen emerged from a Chinese lab. But this isn’t stopping the Biden administration from forging an agreement that would give the world body control over your life and those of our fellow Americans.” But then, I wouldn’t expect the Biden/Obama Regime to be concerned with our liberties in this country. Anyone who understands this current Regime already knows that the Biden/Obama Regime puts the rights of Americans LAST—and I mean last!

Duke noted also that: “...The WHO’s head is a Third World ex-(and maybe current) Marxist who, though not a doctor, was given the opportunity to mismanage health crises in his native Ethiopia. It’s a story that has flown far under the radar despite possibly being one of this year’s biggest developments.” It was big enough that Tucker Carlson dealt with it on Fox News last Thursday evening, which I assume did not make the big shots in our managed media really happy.

Tucker Carlson said: “So, imagine the civil liberties abuses that you lived through during the COVID lockdowns, but permanent and administered from a foreign country. Here’s what we’re looking at tonight. This January, the Biden administration submitted a series of proposed amendments to something called the International Health Regulations (the IHR.) Now, the Biden administration’s amendments, along with those from several other countries, will be combined to create a new global pandemic treaty...That treaty is set to be adopted starting this weekend in Geneva at the World Health Assembly.”

The full text of the treaty isn’t finished yet—but there is a catch. There always is with the United Nations in their quest for a New World Order. And it’s this: “The World Health Organization gets to define what a pandemic is, when a pandemic is in progress and how long a pandemic lasts. Then you read the fine print and you realize the WHO will have total authority over emergency operations in the United States if there’s ever a ‘public health emergency.’ Huh?” Go back and look at that again. The Biden/Obama Regime is about to give the United Nations control of our health care system! Isn’t that just lovely?

And Selwyn Duke made this point: “Carlson makes the point that this isn’t about public health, but public control. As to this, the Biden administration has ensured that the treaty contains a provision for a ‘compliance committee’ which sounds about as innocuous as a ‘Disinformation Governance Board’ (the currently suspended federal effort to control speech).” So basically what Biden? Obama want to do is give the UN control over our health care system. They can deny it, but that’s what it amounts to.

Tucker noted that in 2020 Sandra L. Shullman, Ph. D said that “We are living in a racism pandemic.” Do you begin to see where this is all going? Leave it to the sellout Biden administration to come up with something like this as they work to make us into merely one more cog in their hoped-for world socialist system.
