So, What Will Happen with The Mid-Term Elections—An Honest Vote or Something Else?

By Al Benson May 14th, 2022

It should come as no surprise that, after the charade perpetrated in the 2020 elections, many patriotic Americans are concerned that in this year's elections we might well see a repeat performance. And these Americans, contrary to the current socialist trend, are not insurrectionists or terrorists, they are just ordinary folks who feel that we are probably in for some vote legerdemain in the upcoming elections—based on what happened in the last go-round. They reason that, if the last election was tainted, that we can only expect more of the same.

Lots of Republicans, some of them RINO's, seem to feel that the upcoming mid-term elections will be a shoo-in for Republicans given the abysmal performance of the Biden-Obama Regime and if the upcoming elections were on the up and up that would probably be true—however...!

There was an article on <https://pjmedia.com> for 5/13 that dealt with this. I didn't get the title or the author because my computer screen was doing gyrations at that point, but I did get some of the quotes when the computer screen would stay still long enough for me to write them down. At one point the article stated: "The ballot is not secure, electoral integrity laws notwithstanding. It's safe to say the Dems have no intention of losing the mid-terms and we can rest assured they will pull out all the stops to ensure their success. There can be no room for conservative complacency and certainly not for premature celebration."

And I don't doubt there are RINO's out there that will promote exactly that sort of foolishness because, at heart, they are internationalist types who have no loyalty to conservative principles, and they don't really care who wins if they get their slice of the political pie.

The article mentioned a book by a Michael Newton called *The Path to Tyranny* which was published back in 2010. It is still available on Amazon. Newton stated: "The United States is repeating the mistakes of the past: redistributing wealth through a progressive tax system, expanding the size of government, creating fictional wars where none exist, enriching the political class, establishing an army of unelected bureaucrats to control the lives of the people, and deliberately flirting with bankruptcy." You must remember, this book was written back when Obama was first in office and Biden is nothing more than Obama's puppet, so the exact same holds true for "his" administration (which is really Obama's third term under Biden's alias.)

Certainly, conservatives and patriots must be on the alert and active in the mid-terms. Whether that will be enough to stave off socialist Democratic shenanigans or not, I don't know—but I have my doubts. If "the fix is in" I'm not sure how we will deal with that, and I can't say any more than that at this point except that the Lord will deal with those who subvert the election process.
